I GOT A DRONE FOR CHRISTMAS... NOW WHAT?

DRONE WORKSHOP

SATURDAY, JANUARY 12
9:30 A.M. - 12:30 P.M.

FREE!

FREE!

CCCC'S WIND ENERGY COMPOSITE LAB
(BEHIND THE HOLIDAY INN EXPRESS)

Drones are one of the hottest new products in recent years. If you've just received a drone, or want to know more about operating the one you have, plan to attend the FREE informational workshop where you'll learn:

- Where can I fly my drone?
- Is a license required to fly my drone?
- How high & fast can I fly?

- Do I have to register my drone with the FAA?
- Is there a weight limit?
- Do I need drone insurance?

This workshop will be conducted through CCCC's small Unmanned Aerial Vehicle Systems (sUAS) program. We'll also introduce the new CCCC UAV drone club, which will be open to community participation in the near future.

To participate, contact Laura Leite, Business & Industry Coordinator, lleite@cloud.edu or by phone at 785.243.1435, ext. 374
Deadline to register is Wednesday, Jan. 5
