Areas of Success:
We believe that our goals are high, yet attainable. The format of the new assessment system is functional and user friendly. 84 out of 91 outcomes were met.

Areas of Concern:
Attendance was an issue in multiple courses. Facilities were also an area with multiple mentions. Competitive compensation is also a concern. In some courses, a baseline level of math would greatly improve student performance.

Impact Issues:
Attendance, facilities, and a review of pre-requisites are issues that need reviewing.

Resources Needed:
A fully functioning greenhouse would enhance plant science courses. An equine facility would greatly enhance student success in that program (while also helping with recruitment). Any additional facilities could also enhance student numbers and learning.

CAS Feedback:
The online program is user friendly and shows potential to be a great aid in improving the assessment process.
