TOPIC:

Instructional Facilities

---

All face-to-face classes are held on Campus. Instructional areas of the Nursing Program include classrooms, nursing faculty offices, simulation center, computer lab, skills lab and designated areas are located on the Concordia and Geary County Campuses.

The college library collection includes nursing periodicals. Media resources specific to nursing are maintained in the nursing department. Students using the library at CCC are to follow the regulations for the institution. See [Library webpage](#)

Clinical facilities are approved by appropriate hospital/facility accrediting bodies for clinical use, as well as by the Kansas State Board of Nursing. The clinical facility has the right to decline student access to their site and are not required to make accommodations for students. Students must meet all requirements of the program. If the student is denied access to a clinical site, it may prevent progression in the program.

### **Transportation**

Transportation to and from clinical and classroom facilities is the responsibility of each individual student.

### **Visiting in the Clinical Area**

If a student desires to visit a personal acquaintance at the clinical site, it should be conducted after school hours, unless the visit is an emergency. Street clothes should be worn.

### **Tobacco**

All health care agencies have a tobacco free policy which will be enforced for students, including on-campus facilities. Tobacco/nicotine/vaping use during theory or clinical hours is not allowed. Tobacco/nicotine products and lighters must be left in personal vehicles. Excessive smoking related odors are not acceptable. If faculty, staff, patients, peers or family report concerns or problems due to odors on the student, the student will be sent home for the day.

### **Clinical Sites**
